"The growing number of vessels shows the Company's eagerness to improve performance and meet the increasing customer demand for gas tankers in the country, considering gas reserves which are currently larger than the oil reserves. Previously, the Company also acquired 1 unit of Very Large Gas Carrier at the end of 2021. This LNG purchase is the Company's initial step to obtaining more LNG vessels in the next few years, which is also a form of the Company's commitment to supporting the cabotage principle and the national shipping industry," said the President Director, Herjati.
