

## **PRESS RELEASE**

# **SHIP Enhances Its Fleet with the Addition of One VLGC Vessel and Ready to Enter International Shipping Routes**

Jakarta, December 11, 2025. PT Sillomaritime Perdana Tbk (IDX Ticker: SHIP, "Company"), a Company engaged in shipping services, specializing in the provision of offshore fleets for the oil and gas industry, continues to strengthen its market share through the addition of a new vessel. The Company has secured a vessel charter contract with an international trading company based in Singapore for the international shipping market, with a duration of one year (firm) and a one-year extension (optional). As part of its preparation to enter the international shipping market, the Company plans to purchase 1 (one) unit of a Very Large Gas Carrier (VLGC), which will be registered under the Indonesian flag.

"The plan to add a new VLGC vessel and expand market share in international shipping is part of the Company's business development strategy. With the purchase of this VLGC, the Company has realized approximately 66% of the total capital expenditure (capex) budgeted for this year, amounting to USD 150 million. The addition of this VLGC is expected to contribute around 5% to the Company's total projected revenue for 2026 and serve as a stepping stone for the Company to enter international shipping," said Hans Raymond Ekajaya, the Company's Finance Director.

The Company owns and operates various types of vessels, including Floating Storage Offloading (FSO), oil tanker, gas tanker, and offshore support vessels such as harbour tugs, supply vessels, crew boats, utility vessels, platform supply vessels, and anchor handling tug supply.

"The purchase of this VLGC is a strategic step in expanding our gas fleet, a plan the Company will continue to pursue in the coming years. It also supports the Company's intention to broaden its operational reach into international markets. We are confident that this initiative will enhance competitiveness, strengthen service reliability, and deliver added value to customers and stakeholders. With a more complete fleet, the Company is ready to meet the growing demand for gas transportation both domestically and internationally," said the Company's Operations Director, Eddy Wirajaya.

"With the Company's proven and recognized competencies in the domestic market, the Company is confident and committed to delivering high-quality international shipping services and capturing various opportunities from international customers," concluded Hans Raymond Ekajaya.
